

July 2024

To Whom It May Concern,

I am writing to commend the exemplary work of Gabriel Dalton and the Oasis of Change Inc. Gabriel, a 15-year-old resident of our West End, Vancouver community, has demonstrated outstanding leadership and dedication to environmental sustainability through his nonprofit organization, Oasis of Change Inc.

Under Gabriel's visionary leadership, Oasis of Change Inc. has achieved significant milestones, including the planting of over 8,000 trees across more than 30 countries and the prevention of over 7,000 plastic bottles from entering the ocean. These accomplishments are a testament to the organization's commitment to creating a greener and more sustainable world.

Additionally, the partnership with Web-Ready has allowed Oasis of Change to further its mission by developing environmentally friendly websites. This innovative approach not only enhances digital sustainability but also raises awareness about the importance of conservation in the digital space.

Gabriel and his team have made a considerable impact on the environment and inspired many within our community and beyond to take action in protecting our planet. Their efforts align with the values and goals of our community and demonstrate what can be achieved through dedication and collaboration.

I wholeheartedly support Gabriel Dalton and Oasis of Change Inc. in their continued endeavors to promote sustainability and environmental conservation. Their work is deserving of recognition and support, and I am confident that they will continue to make a positive difference in our world.

Sincerely,

Spencer Chandra Herbert
Member of the Legislative Assembly
Vancouver West End
